

HIGH TEMPERTURE CHIMNEY DAMPER

Information & Spec Sheet

DESIGN

High Temperature dampers are similar to standard Motorised Dampers but have additional seals and couplings to allow it to cope with the high temperature without damaging the motor.

Used on KILN, Ovens and Exhaust Pipes for Large Generators Projects

All Engineered Air Treatment Damper designs have been tried and tested for over 35 years.

FEATURES

- Range Of Temperature
- Flanges can be Designed to Suit Customers Requirements
- Tried and Tested on KILN Flutes
- Various Actuators Available

All materials used are class 'A' Fully traceable as part of ISO 9001

ADDITIONAL DAMPER INFORMATION

Engineered Air Treatment Ltd. Pride themselves on solving Damper issues and due to the many options available we would recommend contacting our sales team who would also assist where possible.

Engineered Air Treatment are proud of our quality record which allows us to have complete confidence in the products we offer. We adhere to our ISO9001 accreditation and install these values into our valuable employees. This confidence allows us to offer a 2 year warranty with all our products.

We also have complete traceability and files over 20 years old to look back on. We are a can do company.

CE Marking for Standard Gas Retention Dampers

The CE marking shall be the only marking which attests the conformity of the product with the applicable requirements of the relevant Community harmonisation legislation providing for its affixing”

There is also currently no relevant Community Harmonisation Legislation for a standard damper to adhere to and so CE marking to an official European standard is not possible.

CE Marking is required if dampers are Classed as fire rated safety products or according the building regulation 2016 a supporting the structure of the building, that is unless it comes into the Bespoke construction Section of the legislation and then due care and diligence needs to be illustrated.

This is our own interpretation of the current legislation and would react accordingly if required by law.

Engineered Air Treatment Ltd are a ISO9001: 2015 certified company, and can offer full material certification and traceability. We can also issue Certificate of Conformity, stating that we have supplied as ordered. We also supply EC Declaration of Incorporation with our products.
